The *GEOTRACES Intermediate Data Product 2025 (IDP2025)* would not have been possible without the fruitful collaboration of the international marine geochemical community within the GEOTRACES programme and the willingness of 459 researchers to release their published or unpublished data as part of this product. We thank all contributing scientists. The contributor's names and parameters are listed in the *IDP2025_Contributors.pdf* document.

Creation of the *IDP2025* involved the vision, oversight and hard work of a large number of individuals and groups. All these contributions are gratefully acknowledged.
